

Online resources for weed identification and management

So, you are at home and want to get on top of the weed flush that has occurred with the late summer rains. How do you identify new weed species and the best practice control methods and techniques to treat them? Below are a few online resources that can be used to help with creating your management plan (**blue**) and identify your weeds (**orange**):

Land for Wildlife (LFW) Note Series - [LFW Weed Control Methods](#)

[Developing a Weed Management Plan](#)

[Queensland Herbarium](#) - How to collect specimens manual, identify weeds, and the Qld Weed Spotters Network

[Brisbane City Council Weed Identification Tool](#) - use the ID tool or browse weeds A - Z

[SEQ Ecological Restoration Manual](#) - Restoration Manual including control techniques and herbicide application rates for weed species

[Weeds of Australia identification tool](#) - Lucid key style to drill down key features for easy identification

[Save our waterways now - Weeds to Whack](#) - comprehensive list of SEQ species with high-quality photos

[Identifying and controlling weeds - Department Forestry and Fisheries \(DAFF\)](#) - Pest fact sheets including control methods and herbicides

SEQ Weeds app - available from your app store ([iOS](#) or [Android](#)), the app uses a lucid key for easy identification
