Queensland Science Network Newsletter (Edition 10) Dec, 2022

News update; on behalf of The Royal Society of Queensland

Dear Contributing members of Queensland Science Network,

New office bearers for the Royal Society of Queensland

The Royal Society of Queensland has held its AGM and wishes to advise of its new office bearers.

Dr Nelson Quinn is President. **Col Lynam** is Vice-President, Knowledge Management and QSN, reflecting a continued commitment by the Society to develop QSN. **Andy Grodecki** remains as QSN Facebook Coordinator. **Geoff Edwards** has retired from Council but until another volunteer can be identified, retains the role of Web Administrator of the QSN site and will continue to upload material from time to time.

Change in QSN extension Strategy

After publishing Nine extensively filled QSN Newsletters, in 2021-22 (Registered National edeposit ID NED176583-"Royal Society of Queensland- QSN Newsletter"), I decided to switch my attention to the social media LinkedIn service and republish contemporaneous articles about Queensland Science, natural science agriculture and community engagement topics which includes citizen science projects and STEM education activity.

This spontaneous LinkedIn QSN News source (https://www.linkedin.com/company/queensland-science-network), collates real-time information and researchers, museums and collections and expert authors. I will continue to explore this service that fills an extension gap for Queensland Science activity as per our stated aims (https://scienceqld.org/finding-scientific-information/)
Statistics of interest; 340 Followers / 45% live on East Coast Aust / 790 posts per 30days /

Walter Fisher Research Grant(s) for mycology*[c.lynam]* - 2023

The Society is pleased to announce an amount of up to $20,000 for research projects in the field of mycology – macroscopic or microscopic. We would be pleased if you would distribute advice of this round to your memberships. Further information is available via the website https://scienceqld.org/get-involved/grant-opportunities/

Help Expand your membership or Society activity recognition

Some contributing partners continued to realise the potential of QSN I would like your feedback on these proposals;

1. we would like to identify some more people willing to upload their society knowledge content and
2. to develop the events calendar https://scienceqld.org/calendar/ into a comprehensive guide to Queensland events beyond the Inspiring Queensland calendar. Advise us of your field days and featured discussions.
3. Encourage more public to realise that your valuable biodiversity and nature spotting activities and replenish your membership with young minds.
4. **Send me permission to re-purpose your Newsletter articles onto QSN LinkedIn website – show Queensland that science is ACTIVE**
5. **Contact;**

The Royal Society of Queensland
